## Core skills

- Kotlin, Java
- OOP, SOLID
- DRY, KISS, YAGNI
- MVP, MVVM, Clean Architecture
- Material Design
- Git, Git Flow
- XML, Jetpack Compose

- Android SDK
- OkHttp3, Retrofit2, Ktor, REST API
- Dagger2, Hilt, Koin
- Coroutines
- Room
- Fresco, Glide, Coil
- Yandex MapKit, MapBox

- Android Studio
- GitLab, GitHub, Bitrise
- Gradle, ProGuard
- JUnit
- JIRA, Redmine
- Figma
- Firebase: Crashlytics

## Professional experience

### 2021-2023 Android Developer: profsoft.ru

#### Bystronom (100K+ downloads)

Branded mobile application of the supermarket chain.

- Maintained features such as product search, filtering, and checkout process.

#### Marya (5K+ downloads)

The well-known Russian furniture brand.

- Developed and maintained features such as store locator and product catalog.
- Integrated Yandex MapKit for displaying store locations and implementing a map view.
- Improved app performance and reduced app crashes by optimizing image loading
- Implemented data caching.

#### Pervomaster (5K+ downloads)

The dealer of the largest brands.

- Developed and maintained features such as product catalog, shopping cart, and order tracking.

#### AntiAnxiety (5K+ downloads)

The self-help application for anxiety and anxiety disorders.

- Conducted a redesign of the app and refreshed local content.
- Worked with ExoPlayer2 for local video playback.
- Implemented the TableView library for displaying data.

|  |  |
|---|---|
| **Medical** mobile app | **Food delivery** mobile app |

This app for paramedics and physicians to conduct initial medical examinations and integrate with BLE medical devices.

- ◦ Created the project from scratch
- ◦ Developed BLE interactions with various medical devices
- ◦ Implemented caching data and synchronization.

Mobile application for **food delivery** drivers working for a famous local brand.

- ◦ Implemented the display of checkpoints for orders.
- ◦ Developed offline mode, caching and data synchronization.

Also, I created and integrated the **PrettyLogger** library.

**2020-2021 Android Developer: pixlpark.ru**

I developed and maintained features for many app variations with different configurations.

The main feature was an in-app design editor for ordering prints on T-shirts and other printing

productions.

- ● **Yarkiy photomarket** (10K+ downloads) The app for ordering prints of photos.
- ● **Web-to-Print Pixlpark** The demo mobile application that can be created for any site on the Pixlpark cloud platform.

**2020 Intern Android Developer: digitalnomads.software**

This is my start in Android Development. I worked with the team, fixed bugs, maintained existing features and tried to

add new features to multiple projects.

## Education

2015-2019 Tomsk State University of Control Systems and Radioelectronics

- BSc Informatics and Computer Engineering
